

# ECE 2799 Final Report

The final report is a summary of your entire project. It should contain the results of your previous homework assignments including your Market Research, Customer Requirements, Product Specifications, Competitive Value Analysis, Final Design, Test Results, and Cost Analysis for production.

Complete Schematics, Computer Code, Parts Lists and Component Specifications should be relegated to the Appendices if they are too cumbersome to be included in the body of the report. Below is an example Table of Contents.

## Table of Contents

1. Introduction.....	1
1.1. Problem Statement.....	2
1.2. Market Research.....	2
2. Product Requirements.....	3
2.1. Customer Requirements.....	3
2.2. Product Specifications.....	4
2.3. Competitive Value Analysis.....	4
3. Design Approach.....	5
3.1. System Architecture.....	5
3.2. Module Definition.....	6
3.2.1. Input Sensor(s).....	6
3.2.2. Signal Conditioning.....	7
3.2.3. Analog and/or Digital Processing.....	7
3.2.4. Output Drive Circuitry.....	8
3.2.5. Output Actuators.....	8
4. Product Results.....	9
4.1. Product Functionality.....	9
4.2. System Testing & Results.....	10
5. Cost Analysis.....	11
5.1. Initial Investment.....	11
5.2. Return on Investment (ROI).....	12
6. Failure and Hazard Analysis.....	13
7. Recommendations.....	15
8. Conclusions.....	17
Appendix A: Schematic and Parts List.....	18
Appendix B: Computer Code.....	20
Appendix C: Component Specifications.....	24

**NOTE: The details of your work should dictate the structure and content of your report. Be sure that your report is well-written, spell checked, and proofread!**
